

Potato Equipment

**ACME 4-row Potato Planter
with banded fertilizer attachment**

Thiokol 2-row Potato Harvester

\$12,000 for both OBO

Both pieces of equipment are in good working order and have been used with a 100 hp tractor calibrated for 36" row spacing.

Some very minor repairs should be done:

Harvester: Needs new coverings on the conveyor chains.

Planter: Some of the cups are missing but we have a spare chain with cups to replace the ones that are missing. The fertilizer attachment has never been used and is in the box.

We are asking \$12,000 OBO for both pieces of equipment
